

**Congratulations on the purchase of your Grandio Summit Greenhouse!**

The Summit was painstakingly engineered to provide the best possible quality and durability in its class and we can't wait for you to start building! Because you are among the first in the country to receive your Summit, there are a few things we have included to make your building experience as pleasant as possible. Our most up to date assembly manual versions are available at [GrandioGreenhouses.com](http://GrandioGreenhouses.com), in the **RESOURCES** section, under **GRANDIO ASSEMBLY**.

To help simplify the installation process, the manual will be presented in a three-part series:

**Part One: Site Preparation and Base Assembly**

**Part Two: Greenhouse Assembly**

**Part Three: Parts List**

As always, we recommend inventorying your entire kit prior to assembly.

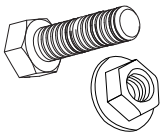

Among your accessories are a few added items that will improve your greenhouse's appearance and make assembly easier.

**Moisture Control Kit** - One of our most popular add-ons, this Kit waterproofs and prevents insects, dirt, mold, and algae from entering the polycarbonate channels, preserving their long-term clarity. This will be one of the first steps in the Greenhouse Assembly manual. This kit consists of Anti-Dust vented tape and RTV Neutral Cure Silicone.

**Goo Gone** - A 2oz bottle of Goo Gone™ is included to remove residue from the removal of the itemized sticker labels attached to each part. Please note that Goo Gone Citrus Solvent should only be used according to the directions provided on the label of the product. Be sure to note all precautions before using.

**S02/ML01 Combo and Summit Door Plugs** - These extra pieces will aid in the construction and hanging of your door. Set them aside until you get to the door assembly section of your manual.

There may be a few other replacement items in this kit depending on your greenhouse size, if you are not sure what they are for, safely place the items in your hardware box for now, and it will be clearly described in the manual where they should be used.

If there are any questions or concerns, don't hesitate to give us a call at 1-866-448-8231. Office hours are 8:30am-5pm M-F.  
Happy growing!
